MOROCCO: Protecting water resources : a main concern for the national office for drinking water (ONEP)

- International Office for Water - Cooperation - International actions - Vocational training and engineering -
Date de mise en ligne : Wednesday 30 July 2008

OIEau - IOWater - OIAgua

Three training courses, financed by German Co-operation (GTZ), took place from 2 to 8 November, from 14 to 20 November and from 28 November to 4 December 1999. They addressed higher executives from ONEP (regional managers and executives from the head office).

These courses aimed at providing a better understanding of French water policy and of the Water Agencies' role and missions. They also dealt with procedures and methods for implementing measures for water resource protection: delimitation of protection areas, water policing, role of the Agencies in this field, etc.

Case studies were of great interest to the participants.
