Global Water Market report 2011 - Meeting the world's water and wastewater needs until 2016

- Pour le site - Actualités -
Date de mise en ligne : Tuesday 4 January 2011

OIEau - IOWater - OIAgua

Fully re-written and updated to replace Global Water Market 2008, the report brings together as much depth and breadth of information, including:

Market forecast datasets for 161 countries - detailed financial information to help you plan your business strategy. Forecasts include capex by municipalities and by industrial water users, operating revenues of private companies, plus treatment equipment and membrane systems.

Country snapshots - each of the 161 countries covered has a 3-page summary, outline the private water projects, desalination and key utility information in the country, enabling you to find vital information at glance.

Extended profiles - we take a closer look at 50 countries where private sector participation has been encouraged. These are written by in-country industry experts, providing you with the key local knowledge you need to compete with local companies.

Commentaries -6 essays give you a detailed overview of the market as a whole, including infrastructure and technology, the outlook for private water, and water scarcity, desalination and reuse.

Global datasets - all the data is provided in spreadsheets on the accompanying CD-ROM, for you to manipulate for your own particular needs.
