CWA Annual Conference : Constructed Wetlands - Domestic, Commercial & Industrial

- Pour le site - Agenda des événements -
Date de mise en ligne : mercredi 13 juillet 2011

OIEau - IOWater - OIAgua

Constructed wetlands continue to be a popular choice for a range of applications and take-up of the technology across Europe and other parts of the world is now quite extensive. As a result our experience of their design, operation and capabilities continues to grow. When specified appropriately, a well designed constructed wetland offers a robust and reliable process option with minimal energy requirements. There are a number of legislative changes in the pipeline that will further add to the attractions of constructed wetlands including concerns over the spill frequencies of intermittent discharges, minewater drainage and further applications of the Water Framework Directive. The resulting requirements to meet tighter standards must be delivered against a background of reducing carbon emissions across the whole water industry.
