2nd Istanbul International Water Forum - An Istanbul Perspective on Regional Water Challenges and Solutions

- Pour le site - Agenda des événements -
Date de mise en ligne : Tuesday 3 May 2011

OIEau - IOWater - OIAgua

The 2nd Istanbul International Water Forum will primarily focus on the water-related issues of Middle East and North Africa, Central Asia, Eastern Europe and Turkey.

The focal regions of the 2nd Istanbul International Water Forum were selected in accordance with the framework of the 5th World Water Forum's "In and Around Turkey" sub-region. Through a number of preparatory meetings held in the Middle East, the Balkans, Central Asia, the Mediterranean and Turkey, the "In and Around Turkey" sub-region provided a platform for the regional stakeholders to address region-specific water challenges and enhanced the collaboration among the region to maximize the regional contribution to the 5th World Water Forum. The 2nd Istanbul International Water Forum aims to continue this momentum and widen the scope of the "In and Around Turkey" sub-region and ensure that the water-related issues of this region are better represented at the next World Water Forum.
