Aquaculture 2015 : Cutting Edge Science in Aquaculture

- contenu - Agenda des évènements -

Date de mise en ligne : dimanche 23 août 2015

OIEau

Aquaculture 2015 will follow on from this success, using the motto Cutting Edge Science in Aquaculture. It will highlight the top scientific approaches being used to advance the global aquaculture industry. The conference is a must if you and your research group are at the cutting edge of aquaculture science, especially if your research is advancing aquaculture diseases, feeds, genetics, ecological interactions, and sustainable systems.

The main research themes at Aquaculture 2015 will be :

- Research innovations on aquaculture's interactions with the environment
- Modern methods for disease detection and control
- Applications for physiology and experimental biology to improve the sustainability of aquaculture
- New targets and tools for selective breeding of aquaculture species
- Nutritional advances using molecular techniques
- The governance of aquaculture value chains
