Side Event : "Transboundary Waters, Climate Change and Good Governance"

- contenu - Actes des conférences internationales - 2012 - Rio + 20 -

Date de mise en ligne : jeudi 7 juin 2012

OIEau

Thematic Focus - **Water Security**

Transboundary water issues have cross-cutting implications for the aims of Rio+20. This side event will focus on the UNWC as a tool to fill in gaps in the institutional framework for sustainable development, and also as a framework to address water-related impacts from climate change in the context of a green economy.
