The Tonle Sap Authority (TSA) has the main task of coordinating the management, conservation and sustainable development of the Tonle Sap Lake Basin, which is a unique water system. In the medium term, the TSA wants to develop a Master Plan for Water Development and Management of the entire Tonle Sap Lake Basin. In the short term, the goal of the cooperation project engaged, of which IOWater is the operator, is to test new governance in the Stung Sen sub-basin.
