NOVIWAM in southern european regions : a new water cluster approach

- IOWater - Our projects : news and update -

Date de mise en ligne : jeudi 14 février 2013

OIEau

The NOVIWAM project (Novel Integrated Water Management Systems for Southern Europe) aims to promote interregional cooperation on tools and methods for water management at river basin level. The International Office for Water is involved in various areas of the project, such as analyses of gaps, weaknesses and opportunities of decision-making supporting tools, drafting of a guide for regional authorities to promote internationalization of research and innovation, but also communication and dissemination, as well as the coordination of the French group of partners (Poitou-Charentes Region, INRA, CEMAGREF/IRSTEA).
