Cambodia - Pilot Project for the Stung Sen River Basin

- IOWater - Our projects : news and update -

Date de mise en ligne : samedi 29 mars 2014

OIEau

After the two decentralized cooperation projects of the Loire-Brittany, Seine-Normandy and Rhine-Meuse Water Agencies carried out in the Mekong countries, a pilot project, coordinated by IOWater, began in late 2012 for two years in the Stung Sen River Basin, main tributary of the Tonle Sap in Cambodia. Training courses carried out during short term missions of French experts helped provide the team of the Tonle Sap Authority and some key people of the Ministry of Water Resources and Meteorology (MOWRAM) with a solid knowledge base on River Basin Management.
