Water and Development Congress & Exhibition 2015

- contenu - Agenda des évènements -

Date de mise en ligne : lundi 19 octobre 2015

OIEau

Water is one of the most critical issues facing the world today, with developing and emerging countries facing some of the biggest challenges. The Water and Development Congress & Exhibition brings together thought leaders and decision makers from within and outside the water sector to address the key issue of 'Water Security for Sustainable Growth'. Organised by the International Water Association (IWA) in Jordan from 18 – 22 October, the Congress features a range of topics and a diverse set of viewpoints from global water leaders. Agenda setting Keynote Speakers will daily set the tone and address the key opportunities to finding solutions for global water challenges.

The Congress focus will be on key topics that catalyse transformational change and support transition to new ways of managing water resources and delivering water services.

We are looking for contributions under the sub-themes below to present global best practice, applied research, policy developments and solutions to challenges faced by water professionals in low and middle income countries. We especially encourage presentations that focus on **the dynamic interactions between water and urbanisation ; water, food and energy ; and water and climate change.**
