OIEau - IOWater - OIAgua

This year the main sessions focus on the nuts and bolts of restoration and enhancement techniques, managing partnerships and projects, and money matters. The event will include presentations from Philip Weller (Executive Secretary of the International Commission for the Protection of the Danube River) and on Defra's £25M Catchment Restoration Fund. On the second day, morning and afternoon workshop sessions will launch RRC's 'PRAGMO' monitoring guidance and RESTORE's knowledge management wiki tool to share best practice EU river restoration.
