CICOS Hydrological monitoring and SDAGE of the Congo Basin

- IOWater - Our projects : news and update -

Date de mise en ligne : vendredi 17 février 2012

OIEau

The International Commission of the Congo-Ubangi-Sangha Basin (CICOS), IOWater, the hydrological services of the four "CICOS" Member States, the french Rhine-Maas Water Agency and Solidarity Water Europe (SEE) have obtained funds from the **Water Facility of the European Union** to allow capacity building for hydrological monitoring and **the drafting of the Master Plan for Water Development and Management (SDAGE) of the Congo Basin**.

<p class="MsoNormal" style="text-align:justify;mso-hyphenate:auto;mso-layout-grid-align:none;text-autospace:none">

<p class="MsoNormal" style="text-align:justify;mso-hyphenate:auto;mso-layout-grid-align:none;text-autospace:none">IOWater will carry out training courses with the Rhine-Maas Water Agency and SEE.<o:p></o:p>

<p class="MsoNormal" style="text-align:justify;mso-hyphenate:auto;mso-layout-grid-align:none;text-autospace:none">This project started in late 2005 and ended in December 2010.<o:p></o:p>

<p class="MsoNormal" style="text-align:justify;mso-hyphenate:auto;mso-layout-grid-align:none;text-autospace:none">

<p class="MsoNormal" style="text-align:justify;mso-hyphenate:auto;mso-layout-grid-align:none;text-autospace:none">"FFEM" entrusted the International Office for Water with the final evaluation of the project.

Strengthening the training centers (CFOs)

<!--[if !supportLineBreakNewLine]-->

<!--[endif]--><o:p></o:p>

As part of the reform of the water sector in the Congo Democratic Republic, IOWater won a tender issued by the World Bank concerning the definition of the CFOs training units.<o:p></o:p>

<o:p> </o:p>

The project purpose is to propose the most appropriate solutions to support the practical training of the operating staffs. Putting the trainees in real situations is at the core of the project, which is divided into two operational phases : an initial audit of the existing installations, a suitable design of units in collaboration with the Training Directorate and the Executive Unit of water projects. The first step showed that the facilities of the CFO in <st1:city w:st="on"><st1:place w:st="on">Kinshasa</st1:place></st1:city> could be rehabilitated but that others were to be acquired. <o:p></o:p>

<p class="MsoNormal" style="text-align:justify;mso-hyphenate:auto;mso-layout-grid-align:none;text-autospace:none">

In collaboration with technical teams and also with Congolese trainers, many units are being studied such as : an educational pilot unit for drinking water production, a network for training on the installation of pipes, a welding workshop, a set of meters, etc.
