UN : Ban Ki-moon : Water is the key to sustainable development

- IOWater - Our projects : news and update -

Date de mise en ligne : dimanche 3 mars 2013

OIEau

During the Water Summit held in Budapest last October, Mr. Ban Ki-moon, UN Secretary General, stressed the important role of water in sustainable development.

He presented three priority areas where water is essential for development : food security, adaptation to climate change and sanitation.

Mr. Jean-François Donzier, IOWater General Manager, was invited to lead the session on Water Governance in the Civil Society Forum organized within the Summit, during which he presented an introductory framework paper.
