Lebanon : "Aquarius" training

- IOWater - Our projects : news and update -

Date de mise en ligne : 2008

OIEau

Aquarius, with the strong will to maintain its leadership in Lebanon on the treatment of drinking water, swimming pool water and wastewater, continuously upgrades its know-how through training courses carried out by the **International Office for Water**.

Thus, in 2007, IOWater trained engineers from Aquarius on the design and sizing of wastewater treatment plants using activated sludge.

This training course was supplemented by a field trip on the design of drying beds planted with reeds.

A training course is now planned for 2008 on drinking water treatment techniques.
