

Water information systems in the South and East Mediterranean countries

Eric MINO
Euro-Med Information System
on know-how in the water sector
www.emwis.net

Architecture based on federated national web portals

- **Today 16 national websites**
- **Key issues:**
 - Focus on know-how
 - Decentralised management
 - Public information

From know-how to quantitative data

- Reliable data necessary for efficient IWRM
- Feasibility studies on national intranets
- Data vs know-how exchanges
- National intranets could feed EMWIS portals

Major constraints identified

All countries are willing to establish or enhance their NWIS but...

Preliminary analysis of a Med water observation mechanism

Current status

- **Countries status:**
 - Fund rising stage:
 - Jordan, Lebanon, Palestine
 - Developments launched
 - Algeria, Tunisia, Morocco
- **Current activities on**
 - Interoperability with WISE
 - Cataloguing data sources
- **Follow-up on the Med water observatory mechanism in the framework of the Union for the Mediterranean**

Union for the Mediterranean New impetus & expectations

- **Civil Society:**

- “underline the need for reliable data and to enable the free flow of information and sharing of data”*

- **Ministerial declaration:**

- “reaffirm the importance of data, information and statistics on water, based on internationally agreed definitions and methods, structured within information system”*
 - “call for strengthening the coordination of existing Euro-Mediterranean initiatives and networks on information and expertise, policy planning and monitoring”*
 - “underline the importance of exchange of good practices, including through EU, Mediterranean, and other relevant programme”*

Thematic forums/folders

Ground water, water scarcity
Water glossaries, satellite images, etc.
