## **COSTO DE LA ADAPTACIÓN AL CAMBIO CLIMÁTICO A NIVEL DE CUENCA VS. COSTO DE LA INACCIÓN**

Webinar RIOC, October 13, 2020

# CONTEXT OF THE PCJ RIVERS BASINS

# CONTEXT OF THE PCJ RIVERS BASINS

Does current knowledge make it possible to define sufficiently “credible / precise” development scenarios in terms of water resources?

Not! We need to learn to work in an environment of uncertainty.

# THE CHALLENGE OF WORKING WITH UNCERTAINTIES

- Develop knowledge for management
- Monitoring;
- Dialogue with the actors;
- Plan continuously;
- Develop capacities;
- Learn from mistakes.

# AN EXAMPLE

You have made comparisons between "business as usual" and "ecological voluntarism": what conclusions do you draw?

We need to develop a balanced approach.

# THE RESILIENCE CHALLENGE

- The resilience basin is a well-managed basin;
- It is necessary:
  - Discuss financing;
  - Promote interchange and associations;
  - Strengthen institutions;
  - Implement a negotiated agenda;

# OUR AGENDA

## GREAT GUIDELINES:

- Water quality
- Water supply
- Underground water
- Education, communication and innovation
- Protection of water sources
- Management
