The BIO-PLATEAUX Conference
Cayenne, French Guiana
26 November 2019

Organized within the framework of the Interreg Amazonia Cooperation Program, the BIO-PLATEAUX Conference (26 November 2019) will **focus on water resources and aquatic biodiversity management** in both Maroni and Oyapock transboundary basins. The discussions will be based on available information and perspectives related to the monitoring of water resources, including the most advanced technological means (such as space hydrology). The aim will be to **prepare jointly a path towards a better sharing of information and knowledge** on water resources.
